HTS Texas and Direct Expansion Solutions Relocate to New San Antonio Office

Company Quadruples the Size of Office and Warehouse Space to Accommodate Growing Central Texas HVAC Market

(San Antonio, TX – May 30, 2014) – [HTS Texas](#), one of the largest independent commercial HVAC manufacturers' representatives in North America, and [Direct Expansion Solutions](#) (DXS), a sister company of HTS that specializes in variable refrigerant flow (VRF) implementation and design, announced today that their San Antonio office has relocated to a new, larger space to accommodate the growing needs of the Central Texas HVAC market.

Located at 127 W. Nakoma Dr, San Antonio, TX, 78216, just across the street from the company's former location, the 15,000 square-foot complex consists of an office and a warehouse facility outfitted with [Daikin's VRV system](#), to provide clients and employees with the state-of-the-art climate control. The grand opening for clients and vendors will take place on July 31.

The 8,000 square-foot office has a dedicated educational training room for industry accredited educational opportunities to keep customers and sales teams up-to-date on the latest innovations, trends and best practices. The 7,000 square-foot warehouse with a fully stocked showroom carries a full range of reliable and efficient HVAC equipment as well as aftermarket, replacement and warranty parts.

"The booming Texas economy not only results in new construction, but also creates opportunity for building owners to upgrade their HVAC systems, increasing the demand for the most energy-efficient HVAC equipment and supplies," said Paul Naizer, HTS Texas San Antonio branch manager. "With the relocation of our San Antonio office, we have an enhanced ability to not only educate our clients and sales teams about the best heating and cooling products on the market but also to make that equipment and parts conveniently available to building owners, facility managers and contractors."

HTS' San Antonio office continues to experience tremendous growth, especially within its service, parts and building automation systems departments. The office has added 15 employees in the past two years to accommodate the market demand for energy-efficient HVAC solutions and has been recognized by [Daikin](#), the number one commercial HVAC manufacturer in the world, with a Pinnacle Award in October 2013 as the highest performing distributor in its division.

About HTS

With nearly 400 employees, HTS has offices in 16 cities across the U.S. and Canada, representing more than 80 HVAC suppliers. Delivering Real Success® to all involved in its projects, HTS provides HVAC and refrigeration solutions to commercial, institutional, residential and industrial markets that represent leading manufacturers such as Daikin AC, Daikin Applied and Haakon Industries. About Direct Expansion Solutions

Direct Expansion Solutions (DXS) was founded in 2007 to develop a dedicated team of specialists to address the rapidly growing Variable Refrigerant Flow “VRF” segment of the air conditioning industry. Due to the rapidly growing demand for high efficiency and green building standards, DXS has experienced tremendous growth by helping owners and developers save time and money with the state-of-the-art Daikin VRV/VRF air conditioning system. DXS serves Toronto and the state of Texas with offices in Austin, Dallas, Fort Worth, Houston, and San Antonio. The DXS experience includes nearly all market sectors from retail, office, residential, military, healthcare, educational and industrial applications. For more information, visit www.DXSeng.com.
