

Aggreko doubles size of Minneapolis Service Center

New larger facility meets increased customer demand for power, heating and cooling and oil-free air

Houston – Aggreko has moved to a new 20,000 sq. ft. service center in Minneapolis to meet increased customer demand for its power, HVAC and oil-free air rental products and services.

The new facility is double the size of the previous center and gives the world leader in mobile, modular, heating, power and cooling and oil-free air additional space to deploy a full range of Aggreko equipment, including natural gas and diesel generators, cooling towers, air conditioners, heaters, oil-free compressors and accessories.

Sales and technical staff are also based at the new center, to offer customers the benefits of their collective market-leading expertise, training and attention to safety.

“We are delighted to unveil this new service center and continue to offer Minneapolis access to our latest power, heating and cooling innovations,” said Charley Royce, Vice President Field Operations for Aggreko. “For 22 years, Aggreko has proudly served customers here in the business community and our new center allows us to continue to do this in a bigger and better way.”

The company’s power, heating and cooling, and oil-free air compressor equipment also gives customers the benefit of Aggreko Remote Monitoring (ARM). ARM collects real-time data from Aggreko’s equipment and transmits it 24/7 to its Remote Operations Center (ROC), a unique response service staffed by expert technicians who diagnose problems and proactively prevent equipment downtime. ARM’s services offer customer operations teams the assurance that their facilities, plants and events will continue to run smoothly, with minimal downtime and save on capital expenditure costs.

The new service center is now open at 7770 County Road 101, Shakpoe, MN 55379, from where Aggreko will continue to meet customer needs in the petrochemical and refining, manufacturing, food and beverage, construction, facilities management and events industries.

EDITOR'S NOTES

Around the world, people, businesses and countries are striving for a better future - a future that needs power and the right conditions to succeed.

Aggreko works round the clock, making sure everyone gets the electricity, heating and cooling they need, whenever they need it – all powered by our class-leading equipment, trademark passion, unrivalled international experience and local knowledge. From urban development to unique commercial projects and even humanitarian emergencies, we bring our expertise and equipment to any location, from the world's busiest cities to some of the most remote places on earth.

That's what has made us the world's leading provider of modular, mobile power and heating and cooling. We've been in business since 1962. We have more than 7,300 employees, operating from more than 200 locations in 100 countries. With revenues of approximately GBP 1.6bn (USD 2.6bn or Euros 2bn) in 2016, we are listed on the London Stock Exchange (AGK.L) and have our headquarters in Scotland.

Our business helps transform the lives and livelihoods of individuals, organisations and communities across the globe, in both developed and developing countries and markets.

We operate across all sectors, including oil and gas, petrochemical and refining, utilities, manufacturing, construction, mining and events.

We design and manufacture equipment specifically for these requirements in our factory in Dumbarton, Scotland and work with leading innovators to ensure our equipment offers maximum fuel flexibility, by using gas, diesel (including HFO) and renewable fuel sources.
